

NOTES ON THE POINTS LISTS 1995

1) Basic operation: Each racer receives points for each valid result they have in a sanctioned race throughout the year. These points are generated with a numerical formula which takes in to account what top racers competed in the race, how far off the winners time the top racers finished, and how far off the winners time the racer finished. A racers points are an average of their two best results in each discipline for the year. The Combined points are simply both GS and Classic points added together.

2) What if a racer has no results in a discipline for the year? If a racer raced in the previous year, 44% is added to their previous years points and these are then used for their current points. If a racer has no points from the previous year, (a new racer) they start with 1000 points.

3) What if a racer has only one result in a discipline for the year? If a racer has points from the previous year, then 44% is added to these points and they are used as the second result. If a racer has no points from the previous year, 1000 points is used for the other result.

4) What if a racer has two or more results, but their previous years points are still lower? If there are two results in a discipline in 95, 94 points are automatically dropped (when calculating at the end of the year).

5) The F factors used to calculate a racers points will be changed for the 1995 season in GS is 660, and Classic is 375.

6) If the racer has no results in a discipline for the year due to an injury, 22% is added on to last years points.
